Corporate Policy Statement

“Policy for Sourcing Wood, Wood Fiber and Pulp for All Forest Stewardship Council (FSC) Certified Products”

On February 7, 2008, we announced the creation of our green trademark E-Gen. This trademark was created to help identify green products produced by Arclin. Under the E-Gen designation, products are added based on their ability to:

- 1) minimize the level of impact on the environment,
- 2) meet tough new industry requirements,
- 3) and/or have received third party certifications

With the above guiding principles in place, we are establishing this policy.

All Arclin E-Gen FSC Certified products shall meet specific guidelines in accordance to FSC Certified Products standards. In doing so, our E-Gen FSC Certified products will avoid wood fiber from:

- Illegally harvested wood;
- Wood harvested in violation of traditional and civil rights;
- Wood harvested in forests where high conservation values are threatened by management activities;
- Wood harvested in forests being converted to plantations or non- forest use;
- Wood from forests in which genetically modified trees are planted.

If we become aware of Arclin using wood from such sources in its FSC certified products, we will promptly take appropriate actions, including stopping purchases from such sources.

Arclin is committed to making every effort to identify the sources of wood used for our products labeled according to the FSC rules and to establish the origin of materials used in the products affected with sufficient geographical resolution to ensure compliance with this policy. If it proves impossible to identify the origin of some of these raw materials, we are committed to replacing them with materials which can be sourced with confidence. This sourcing policy requires us to verify and monitor our sources, the proportions of raw materials which have not yet been verified, and the steps being taken to replace materials of unknown origin.

By implementing this policy, it ensures well sourced wood products will be available to all customers and continue to support the ideals laid out in E-Gen.

Arclin has appointed Tim Zattau as the contact person responsible for implementing this policy.

Claudio D'Ambrosio – President & CEO
